# DEMO IT GUIDE: Common Troubleshooting

**DEMO ONLY:** This is a sample IT support guide for testing HR Assist. Follow your organization's actual IT security procedures.

## Wi-Fi or internet not working

- Check that Wi-Fi is enabled and airplane mode is off.
- Reconnect to the approved network and restart the device if appropriate.
- If the issue continues, record the error message and contact the IT help desk.

## Password reset

- Use only the organization's official password-reset page.
- Never share passwords or one-time verification codes with anyone.
- If you suspect account compromise, contact IT immediately.

## Raising an IT ticket

- Include a short description, when the issue began, the affected device or application, and any error message.
- Never include passwords, API keys, or other secrets in a ticket.
